FARM FOR SALE.

JOHN CLARK FARM, Containing about three hundred and fifty acres of land; two dwelling houses, three barns and two tenant houses, near the railroad track. The tenant houses are new. The large farm house has been thoroughly repaired and painted, with new plazza in front and end, new front fence, all in the most substantial and tasteful manner, making it a desirable residence. Nearly three-fourths of a mile of new water pipe from a never-failing fountain supplies all the premises.

OVER TWO THOUSAND DOLLARS
has been expended within the past two years
on buildings and fences, besides the tenant
houses. The land is adapted to the raising of
all kinds of crops. Some fifty acres are well
adapted for tobacco. The land is now under a
good state of cultivation, by having been fed
out a large amount of hay and graits the past
two years, which has been brought on the
piace, besides that which the farm has produced. The eastern line is the Connecticul
river and the farm laying westerly, divided into
pasture and tillage land, with a sufficient supply of wood for the premises. Situated so near
the village of helion's Palis—a village growing
more rapidly than any place within the State,
and with its unlimited water power, which is
fast being improved, must continue to increase
it the most desirable farm in these parts. Possession given immediately, except the mill
yard, and that in one year. Inquire of the subscribers on the premises; or Joseph Wilson,
firm of J. Wilson & Co., near the depot; or Wilder & Hopkins, at West Rupert, Vt.

NEW YORK THE GREAT SOUTH AMERICAN JURUBEBA BLOOD PURIFIER.

is the most powerful cleanser, strengthener and remover of Glandular Obstructions known to Materia Medica. It is specially adapted to constitutions "worn and remover of Glandular Obstructions known to Materia Medica.

It is specially adapted to constitutions "worn down" and debilitated by the warm weather of Spring and Summer, when the blood is not in active circulation, consequently gathering fin-purities from sluggishness and imperfect action of the accretive organs, and is manifested by Tumors, Eruptions, Blotches, Boils, Pustules, Serofula, &c., &c.

When wears and languid from overwork, and dullness, drowsiness and inertia take the place of energy and vigor, the system needs a tonio to build it up and help the Vital Forces to regain their cuperative power.

In the heat of Summer, frequently, the Liver and Spisen do not properly perform their functions; the Uterine and Urinary Organs are inactive, producing weakness of the stomach and intestines and a predisposition to billous desrangement.

DR. WELLS' EXTRACT OF JURUBEBA

is prepared directly from the South American Plant, and is peculiarly suited to all these diffi-cutties: it will cleanse the Vittated Blood, strengthen the Life-Giving Powers, and remove all obstructions from IMPAIRED AND ENPERBLED ORGANS.

It should be freely taken, as Jurubeba is pro-nounced by medical writers the most efficient Purifier, Tonic and Deobstruent known in the whole range of medicinal plants. JOHN Q. Mount Mansfield The outline of the summit of Mount Mansfield resembles human features, and hence it is called the "Old Man of the Mountain," He is represented in a reclining posture, his face turned upward. The north peak represents the chin, the middle the nose, and the southern the forehead. The mountain is the highest in Vermont. and from it can be seen elevations in every county in the State. The mountain peak is nearly five thousand feet above the level of the sea. From the 'nose' northward may be seen the wide valley of the St. Lawrence, with the waters of the river visible at intervals. A little to the west of north is Mount Royal, with the tin roofs of Montreal glittering at its base. Almost due north is the bright blue sumant of Jay Peak and to the right of it Owl's Head, and the range of hills border-Owl's Head, and the range of hills border- common inotion can be observed-way ing the west shore of Lake Memphremagog. Further to the right are the Willoughby mountains. The view to the west is filled by the Champlain valley, bounded by the long range of the Adirondacs beyond. Lake Champlain may be seen almost from Whitehall to Rouse's Point. Southward with the precipitate themselves into the gulf which foreruns them, or are hurled unbroken against the rock. A Storm on the Const. A storm, like all great realities is granda storm, the all great relatives is grand-est when best seen; it has nothing to gain from indistinctness of view. Night, if it increases the danger, conceals what the imagination can hardly reproduce, and can-not surpass. The low, driving send overhead is swept along ceaselessly in formless nurkiness; huge masses of foam, churned up in the recesses of the rocks, are torn up by the fierce blasts of the wind and whirled wildly through the air, smiting against the face of the cliffs and the green banks above, which are fleeked with white as from the remains of a snow storm. The black, rocky coast line to the south, until it is lost in a sustained confusion of surging spray and cloud, seems dwarfed under the snowleaps above wave against the lowering clouds, to fall back, burst and baffled, un "Nose," The descent from the mountain is made in about one-half the time it takes to make the ascent.

A balloon ascension had been announced
to take place at Point Airy, the southern
extremity of Windmill (or Smith's) Island,
and as the hour appointed 6 1-2 o'clock)
drew near, hundreds of spectators gathered on the city wharfs and upon the street cor-ners in the neighborhood to witness the novel sight. It was currently rumored that the balloonist on this occasion was the same "No, said Mac, "I want the one you who had during the present summer given similar exhibitions at Gloucester and Smith's "Upon my soul, I have not got it," reing into the limitless expanse above, he had invariably adopted the very sensible pre-caution of fastening his aerial ship by means of a stout rope, to some immovable object on terra firma. There was no little consternation, therefore, when shortly be-fore 7 o'clock the balloon suddenly shot di-

west, and as the air-ship moved off to the northward its progress was watched with breathless expectancy by gaping crowds on both sides of the river.

Meanwhile, the balloonist clad in the bespangled costume of a circus actor, went through a variety of evolutions upon the suspended bar, which seemed to float along in the wake of the balloon. The balloan, when lightened of its load, went careering wildly along upon the waves now white-capped by the stiff evening breeze, in the direction of Cooper's Point, where it finally brought up, in a totally diapidated condition, upon the other piers of the wharf at that point. Luckily there were no frail craft in the way of the unwieldy monster to dispute its right of passage; but on the contrary, the skiffs and batteaux above the island were glad to give the unusual visitor all the sea room to which its novelty entitled it.
